

CE certificate

Inorganic pigments CM

Concrete pavers · Roof tiles · Tile joints · Ready mixed concrete
Precast concrete · Fibercement panels
and more.

itaca INSPIRED
BY SCIENCE

Where construction meets color

Our range of inorganic CM pigments is specially formulated for use in the coloring of cement and concrete, standing out for their high performance, homogeneity and compatibility in all types of compositions.

The CM series is designed to optimise the quality/price ratio, bringing a high aesthetic and economic value to colored products.

From its use for paving, precast concrete or roof tiles, discover how our inorganic pigments can take your projects to the next level, adding color, style and durability.

Concrete pavers

Roof tiles

Tiles joints

Inorganic pigments CM: Key facts

- All our colors range has **CE certificate**. It complies with the most strict normative in the European Union.
- Quality assurance.
- Enhanced intensity.
- Optimal dispersion.
- Assurance on color stability lot to lot. $\Delta E \leq 1$
- Local commercial and technical assistance.
- All colors can be mixed to obtain the desired tonality.

Color	Reference	Color Index	Conductivity ($\mu\text{S}/\text{cm}$)	pH	ρ real (g/cm^3)	Oil Absorption ($\text{ml}/100\text{g}$)	Particle size d50 (μm)
Yellow	CM-AM1100	Pigment Yellow 42	706	5-8	3,5	45,0	1,6
Ultramar Blue	CM-AZ1200*	Pigment Blue 29	497	7-10	2,4	36,3	2,3
Cobalt Blue	CM-AZ1300	Pigment Blue 28	931	7-10	4,0	26,3	2,1
Black	CM-NE1400	Pigment Black 11	785	5-8	4,4	28,2	1,6
Intense black	CM-NE1401*	Pigment Black 11+7	2530	5-8	3,7	33,2	1,6
Brownish Red	CM-RE1500	Pigment Red 101	981	5-8	4,7	19,3	1,0
Red	CM-RE1502	Pigment Red 101	297	6-9	4,9	23,0	1,5
Green	CM-VE1600	Pigment Green 17	331	6-9	4,9	16,8	1,8
